

In addition to energy and cost savings, our pipes and fittings represents the following advantage:

- High quality Aluminum materials
- Lightweight
- Energy efficient
- Expansion/contraction
- Lower total cost of ownership
- “Full bore” design (the minimum inside diameter of AIRpipe is equal or larger than the ID of the pipe)
- Safe to install:
- No soldering equipment required
- No fire hazard
- No threading required
- Low weight.
- Corrosion resistant
- clean air
- Leak-free
